

27.2 Zellmembran (Plasmalemma). A Erythrocyten  
(REM-Bild); B Erythrocyt (EM-Bild, Ausschnitt);  
C Modellvorstellung zur Erythrozyten-Zellmembran

29.3 Osmose (Schema). A bis C Osmometer; D bis F einfache Diffusion durch eine Lipid-Doppelschicht

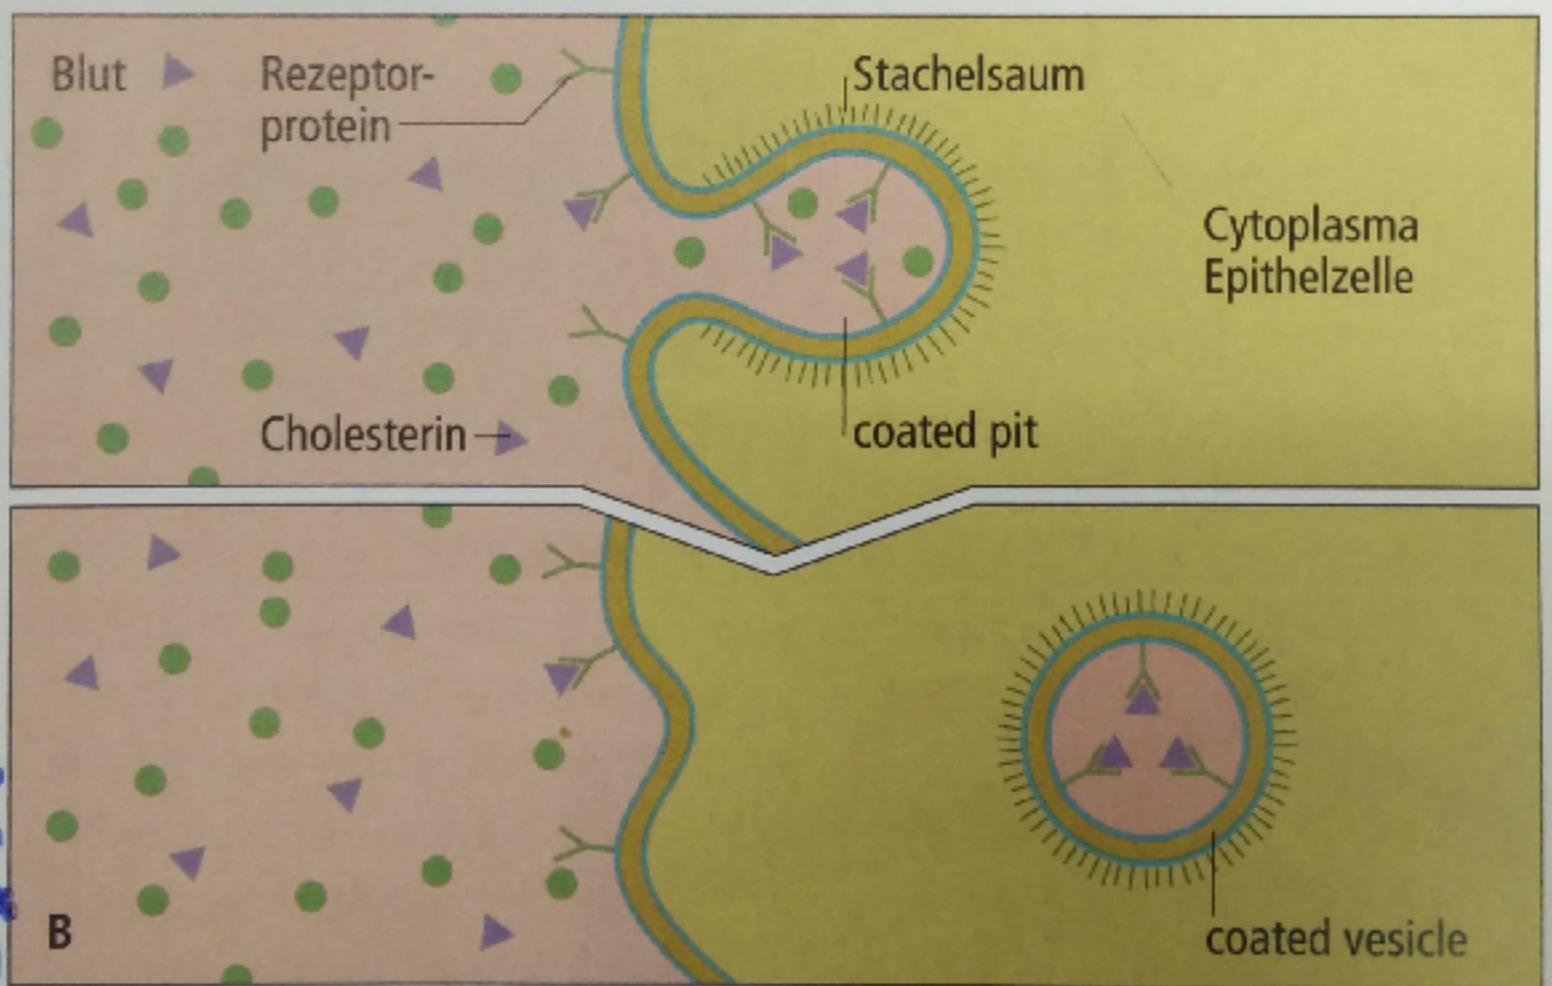

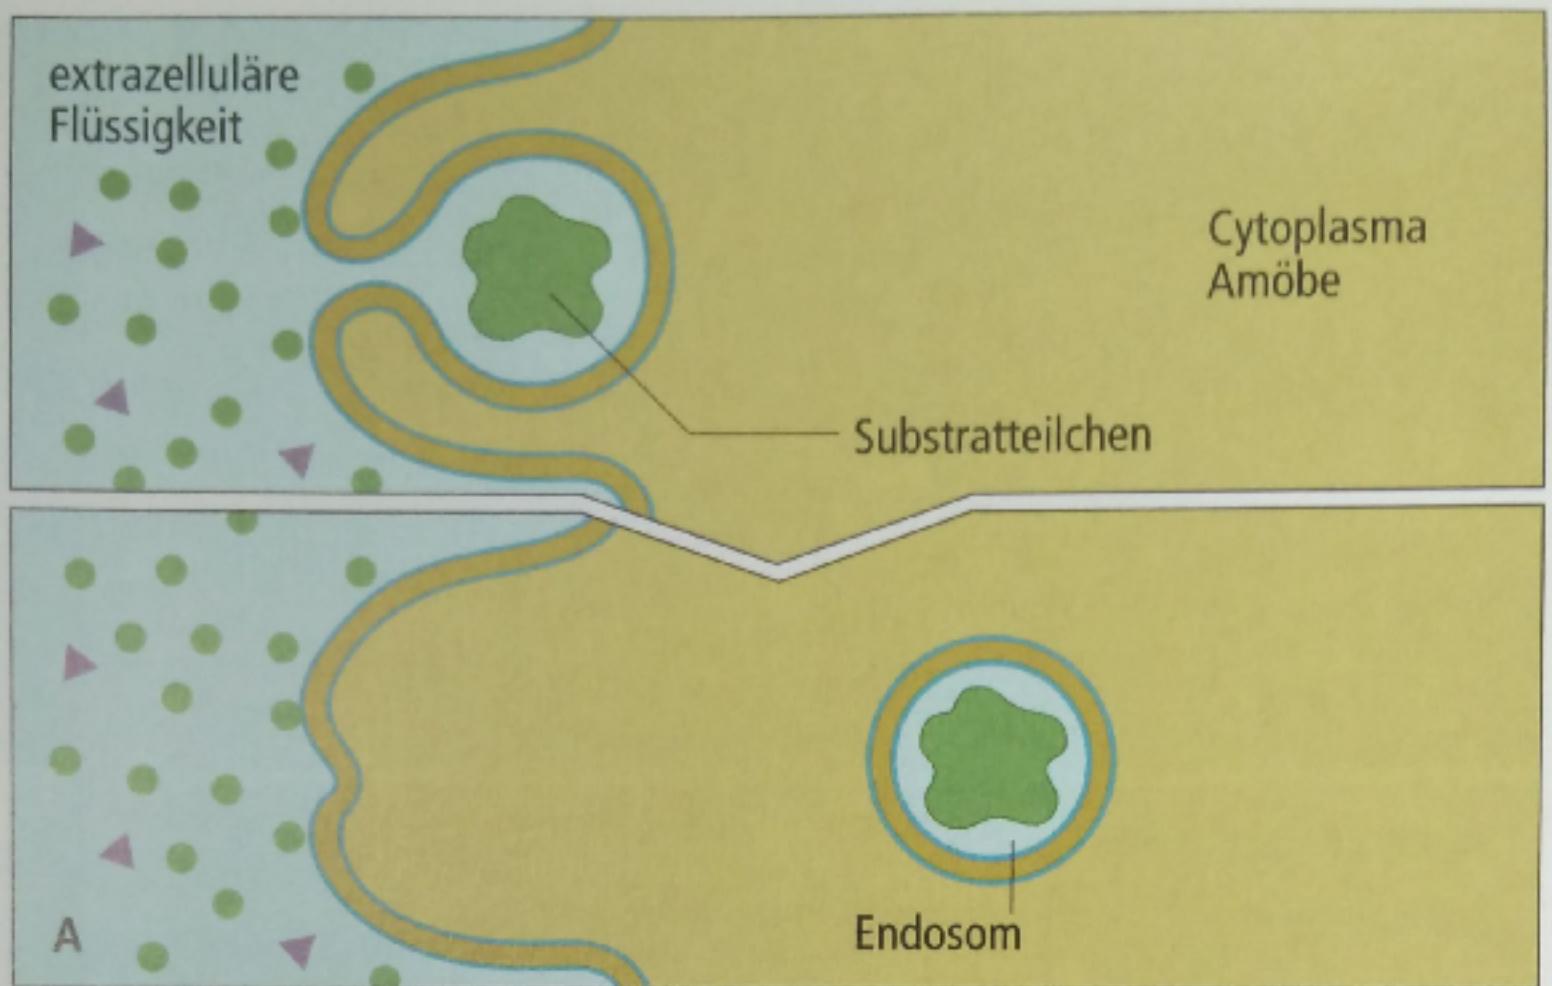

30.1 Stofftransport. A tunnelvermittelte Diffusion;

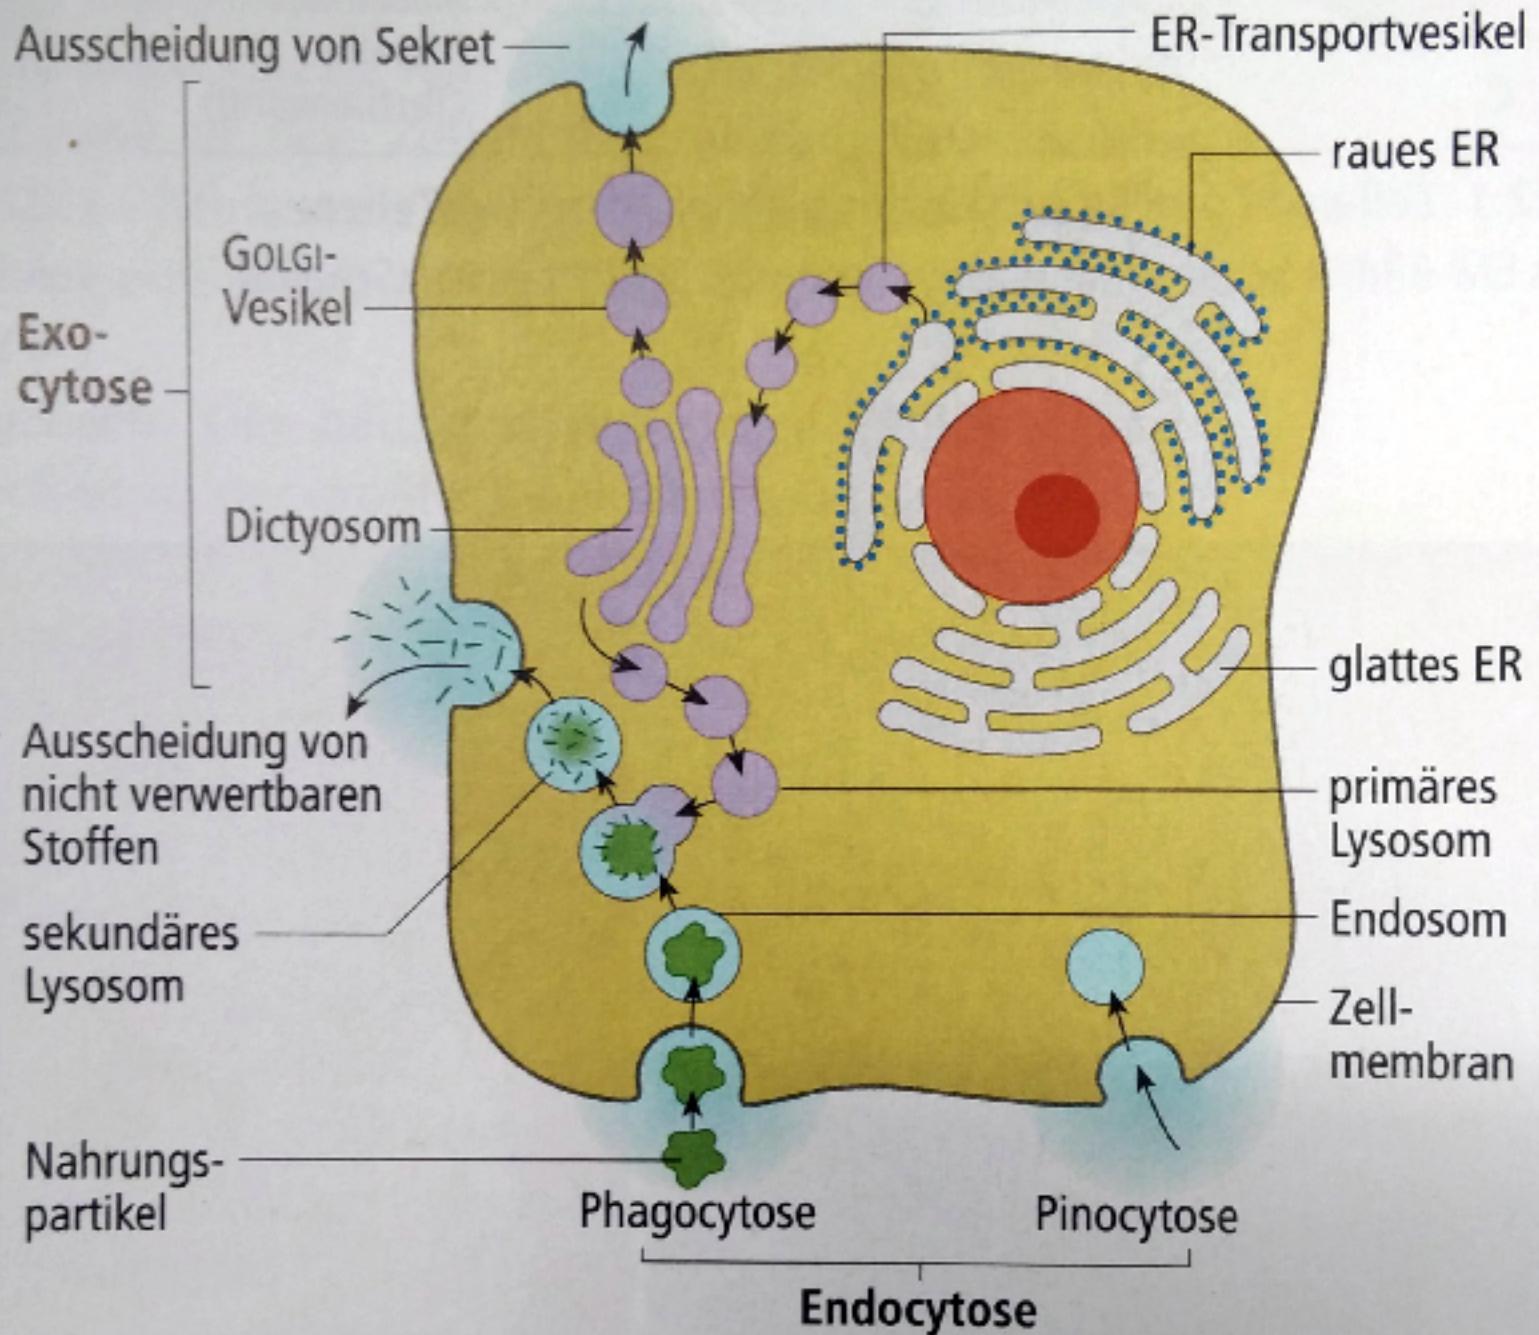

B carriervermittelte Diffusion;

C aktiver Transport;

D Natrium-Kalium-Ionenpumpe

31.1 Endocytose. A Phagocytose; B Rezeptor vermittelte Endocytose

## 31.2 Endozytose und Exozytose (Übersicht)
